- **AI and NLP**

We transform your product ideas into a world class product using our expertise in AI, Machine Learning, Big Data, Platforms, DevOps

- **Browser Extensions**

We provide customized extensions for the various browsers to simplify the process.

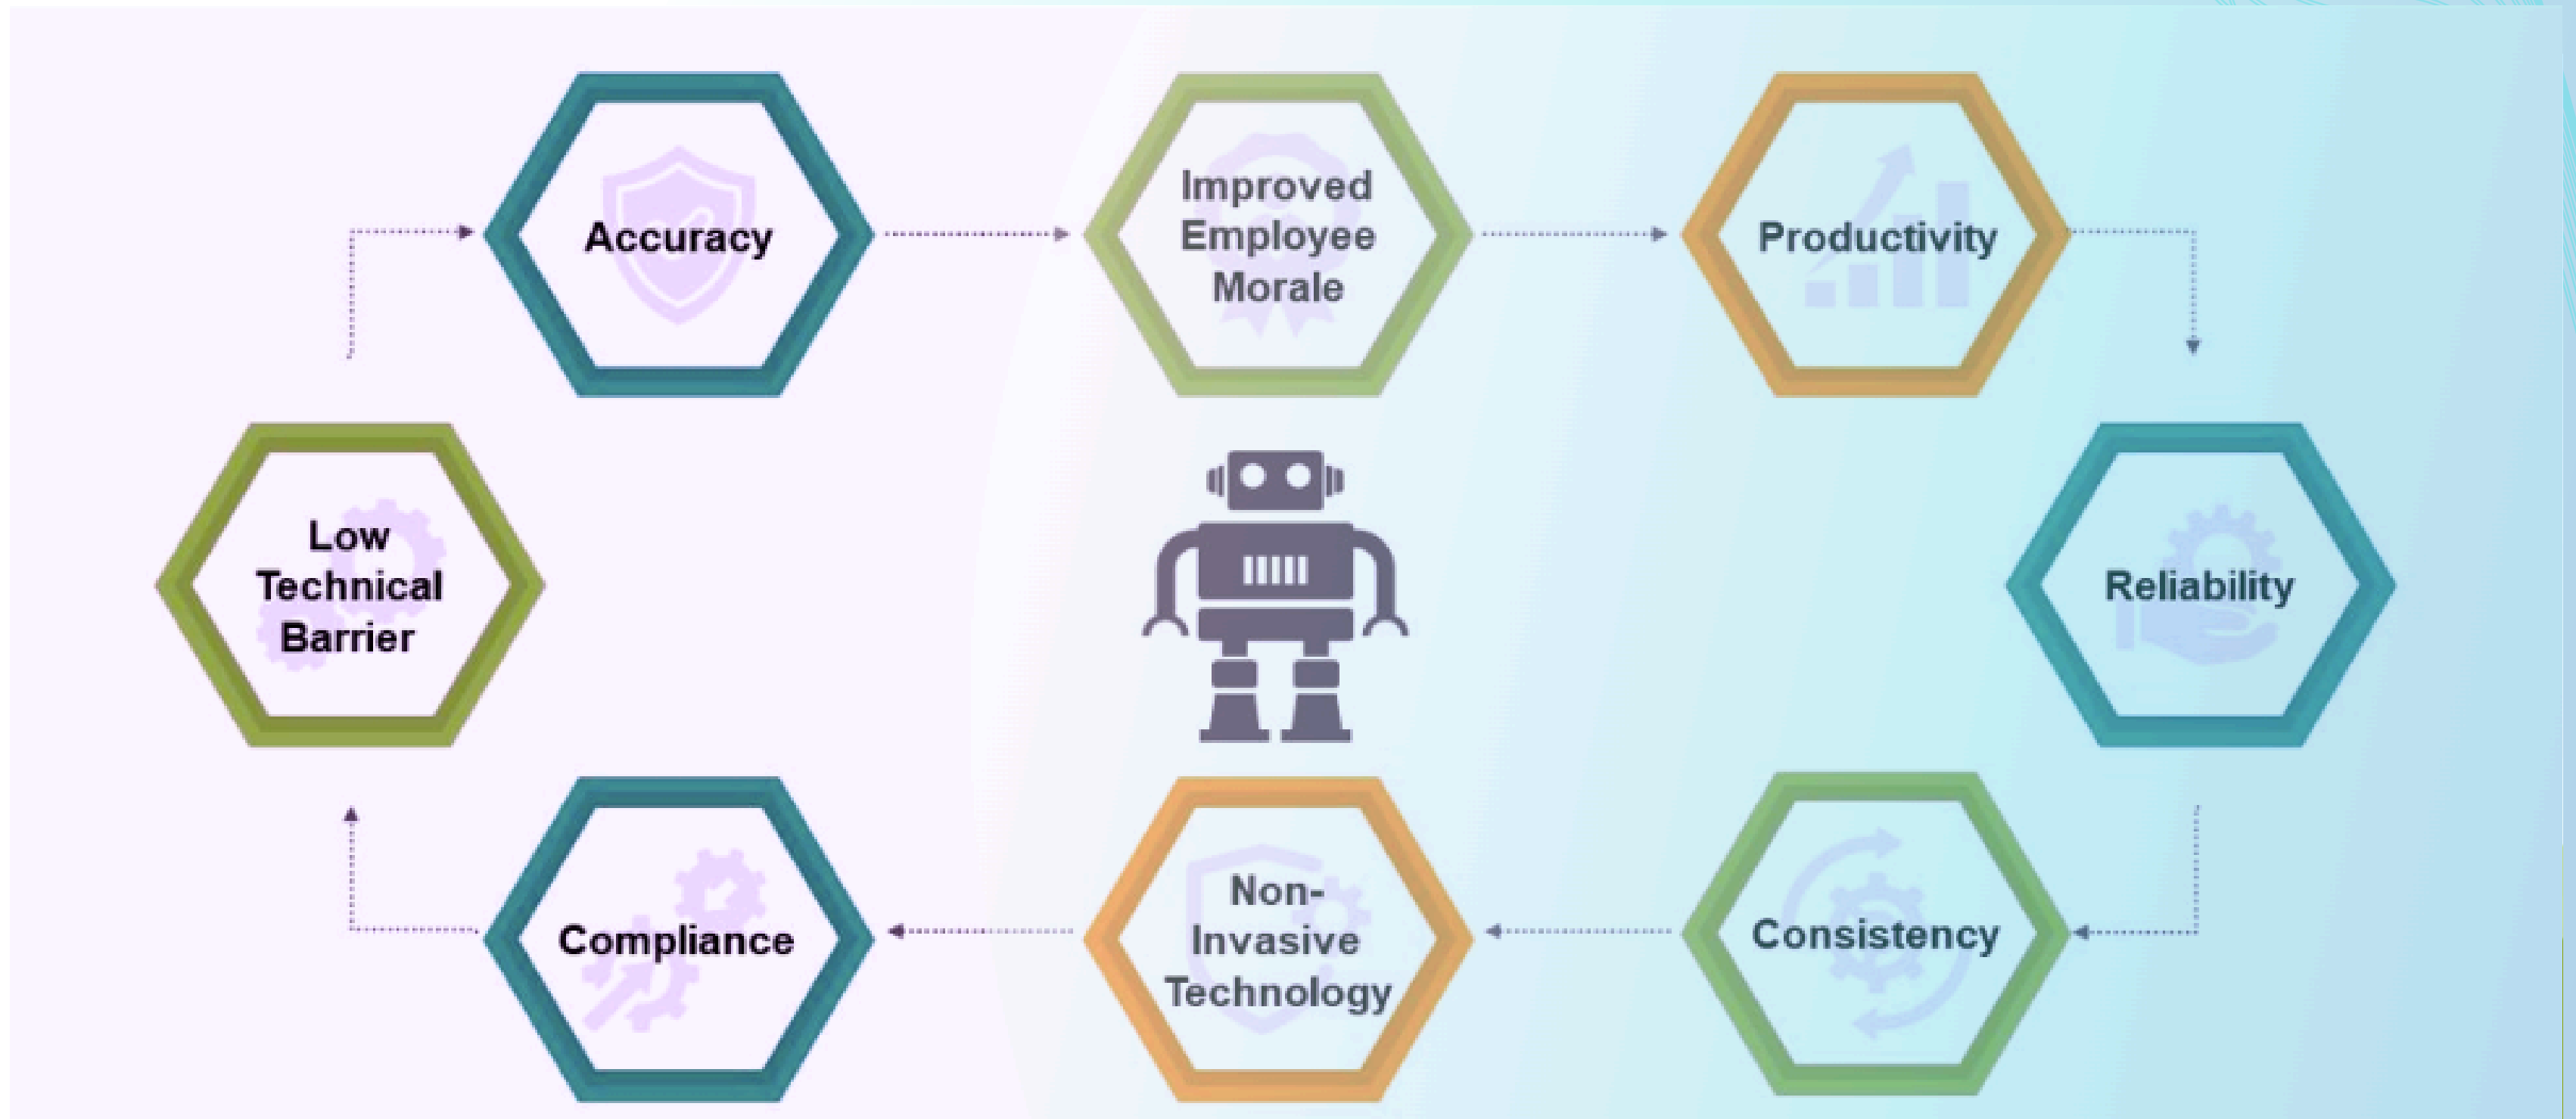

- **Data Analysis & Visualization**

We offer data analysis and visualization services for your process using Tableau, PowerBI etc.

- **Staff Augmentation**

We provide remote developers in different technologies as staff augmentation.

# BENEFITS OF ROBOTICS PROCESS AUTOMATIONS

# THE PROCESS

We understand your business objectives, your users, and the issues or opportunities you are trying to solve.

As we move from "what" users want/think/need to "why" they want/think/need it, we draw conclusions from the data gathered during the research phase and define one or more problem statements.

1

## Research & Analysis

A wonderful idea is where it all starts! Prior to beginning, careful planning is made.

2

## Development & Deployment

Creating operational software and goods by writing code and implementing designs. Testing and efficient application deployment in the market for delivery

3

## Support & Maintenance

Creating a bug-free product and working on upgrades, services, and promotions. In the beginning, We offer maintenance for free in initial phase.

# THE PROJECTS

**83%**  
**REDUCTION IN MAN  
HOURS OF WORK**

## **CLIENT INDUSTRY: TELECOM PROJECT TYPE: SOC NOC REPORTING**

### Project Overview:

A top mobile telecommunication company in South-East Asia approached us with their problem that their SOC NOC report has to be created daily and it takes a lot of manual activity from their side. SOC NOC reporting involves gathering various data of a day regarding network traffic, voice traffic, sources, etc., and processing them to get critical information in a digestible format. These reports provide information regarding the following:

- Daily Network Status Update
- App Volume Distribution
- Daily network Status Update
- Data Trend Data Volume
- CS Voice + VoLTE
- Total PS Data Traffic Volume

**80%**  
**REDUCTION IN MAN-HOURS OF  
WORK**

**83%**  
**REDUCTION IN MAN-HOURS OF  
WORK**

## **CLIENT INDUSTRY: TAX ACCOUNTING PROJECT TYPE: SPANISH CLAIMS**

### **Project Overview:**

We recently automated for a tax consulting agency. This consultant company was processing around 1100 to 1300 non-resident withholding tax (TDS) claims per week. They were being raised to the Spanish tax portal – Agencia Tributaria, with the help of 210 files in Modelo 210 (Form 210).

## **CLIENT INDUSTRY: STOCK BROKING PROJECT TYPE: COMMISSION CALCULATION**

### **Project Overview:**

The objective was to download the stock entries from the stock exchange website, process the data to find out nominees, and separate the data in various sheets based on various conditions. Generate a summary report of this data and calculate the commission received on it.

**75%**  
**REDUCTION IN MAN-HOURS OF  
WORK**

**99%**  
**REDUCTION IN MAN-HOURS OF  
WORK**

**CLIENT INDUSTRY: MECHANICAL  
PRODUCTION  
PROJECT TYPE: PROCUREMENT**

Project Overview:

The objective was to get an export of raw materials inventory from Tally and check which items are needed to be procured for BOM of current production. Find out vendors supplying deficient materials and send requests for quotation to them.

**CLIENT INDUSTRY: FINANCIAL  
SERVICES  
PROJECT TYPE: STOCK VOUCHER  
CREATION IN TALLY**

Project Overview:

The objective was to create Sales/purchase vouchers in Tally, based on stock buy or sell transactions in excel. Data is pushed in the Tally application through the backend.
